

## Television

### Transkript:

Television is a big problem for children in today's world. Teenagers watch between 2.5 and 3.2 hours of television every day. Some children watch television in the morning before school but most of them watch it after school, or after dinner. Teenagers watch quiz shows, music programmes and soaps. Girls watch more documentaries, drama and news and boys watch more science fiction and sport. Television is important for children because it helps them learn but parents should not allow their children to watch too much because it is also bad for them.
