

My Job

Transkript:

You are asking me about my job? The place where I work is an Italian restaurant. I basically deal with people there, I serve them food and drinks. So I work there around lunchtime or dinnertime. Before I start, I have to get all the knives and forks ready, and I have to prepare little baskets for bread for my customers. After work I have to count all the money and put it in the safe. What I like about my job is when the people are happy with their meal and enjoy their stay with us.
